## Polarization Modulator

World's Fastest Polarization Switch for 3D Digital Cinema

## **Details**

Newly patented technology makes DepthQ® the world's fastest polarization switch for 3D digital cinema. With a powered, symmetrical 50 microsecond switching time between the eyes, DepthQ® easily ensures bright, lowcrosstalk operation - even at the upcoming 3D HFR (high frame rate) targets of 192 FPS, 240 FPS...and beyond.

When combined with a silver screen, the DepthQ® Polarization Modulator allows your digital cinema projector to display stunning stereoscopic 3D films, viewable using inexpensive passive circular polarized glasses. Paired with projectors up to 30K Lumens, DepthQ® provides a spectacular 3D experience for screens up to 17.7m (58ft). To date, it has been successfully reviewed by executives from six major Hollywood studios and is listed on the Walt Disney Studios Motion Pictures Approved Equipment List.

- Bright, low-ghost 3D
- Crisp, sharp image
- Heat-tolerant
- With 30K lms, 3D screen sizes up to ~17.7 m (58 ft)
- Simple, easy to setup and use
- No moving parts low cost/maintenance
- Compatible with standard polarized 3D glasses
- Patented, Future-proof
- Hollywood approved

aperture: 17.15 x 9.78 cm (6.75 X 3.85 in)

Polarization Modulator for 3D Digital Cinema

Switching Time Open To Closed 1.00 0.70 0.60 0.50 0.30 0.20

No time wasted switching eyes\*

DepthQ® matches all industry standards for image quality, brightness & polarization performance, and is compatible with all DLP projectors. Simply connect via the GPIO port on your projector and you're making GREAT 3D.

Two position actuator (included) allows your theater automation to quickly switch between 2D and 3D.

## **Specifications**

DepthQ<sup>®</sup>

Actuator

## **DepthQ® Polarization Modulator** LC-Tec Displays AB U.S. Patent No. 8023052 B1 17.15 x 9.78 cm (6.75 x 3.85 in) **Aperture** Contrast/Ghost >100 : 1 in each eye Efficiency ~15% Screen Size Given 30K Lumens, 3D screen sizes ~17.7m (58ft) Switching Time 50 µsec (symmetrical)\* Up to 400 Frames Per Second (FPS) Operating Speed Easily supports new 3D High Frame Rates (HFR) of 192 and 240 FPS **Heat Protection** Metallic Pre-Polarizer (increases performance and lifetime) Operating Temp +5 to 52 deg C (40 to 125 deg F)

The DepthQ<sup>®</sup> Polarization Modulator is co-developed by **Lightspeed Design, Inc** and **LC-Tec Displays AB**.

The two companies have over 19 years of experience in their respective fields of stereoscopic design and liquid crystal manufacturing and development.
